HIGH TEMPERATURE TECHNOLOGY

Index to Volume 7 (1989)

No 1 February pp 1–56
No 2 May pp 57–112
No 3 August pp 113–168
No 4 November pp 169–264

Articles

1 A model of creep rupture life under hot corrosion
V. Suryanarayanan, M. Kamaraj, K. J. L. Iyer, V. M. Radhakrishnan 91

2 A review of factors controlling the gas turbine hot section environment and their influence on hot salt corrosion test methods
A. K. Gupta, J.-P. Immarigeon, P. C. Patnaik 173

3 An automatic technique for measuring the surface tension of liquid metals
L. Liggieri, A. Passerone 82

4 Comparison of high and low velocity burner rigs under simulated marine conditions
J. R. Nicholls, S. R. J. Saunders 193

5 Comparative hot corrosion studies of EB-PVD and plasma sprayed coatings
H.-J. Rätzer-Scheibe, K. Fritscher, M. Seiersten 212

6 Cyclic crack growth and closure effects on low alloy ferritic steels during creep-fatigue at 500°C
R. P. Skelton 115

7 Effect of hot salt corrosion on creep rupture properties of AISI 204 stainless steel at 600–700°C
V. Surianarayanan, K. J. L. Iyer, V. M. Radhakrishnan 33

8 Elevated temperature low-cycle fatigue of the austenitic stainless steels type 316 and 253 MA – influence of microstructure and damage mechanisms
R. Sandström, J. Engström, J. O. Nilsson, A. Nordgren 2

9 Evaluation of coolant power losses in a thermal plasma arc reactor
F. W. Giacobbe 11

10 Fatigue and creep crack growth behaviour of Inconel MA 6000
P. Shahinian, K. Sadananda 136

11 Fracture toughness, fatigue crack propagation and creep rupture behaviour in thick section weldments of 3Cr–Mo pressure-vessel steels developed for high-temperature/high-pressure service
P. N. Spencer, R. H. Dauskardt, E. R. Parker, R. O. Ritchie 17

12 Future materials requirements for high temperature power engineering components
J. B. Marriott 129

13 High-temperature strength testing of directly resistance-heated metal specimens
F. Mitter, J. Schrank, E. Werner, E. Pink 145

14 Hot corrosion tests with the NRIM burner rig
A. Ishida, I. Tomizuka, A. Takei, M. Yamazaki 219

15 Hot salt corrosion test results : Report on interim findings
Y. Munakata, T. Senda 226

16 Melting chromium-steel grades by direct reduction of chromite concentrate in an iron-carbon bath
S. A. El-Ghazaly, S. Z. El-Tawil, M. K. Sami 97

17 Microstructural refinement of a superalloy by progressive induction melting
M. Kumar 87

18 NLR experience with high velocity burner rig testing 1979–1989
R. J. H. Wanhill, A. J. A. Mom, H. J. C. Hersbach, G. A. Kool, J. A. M. Boogers 202

19 Performance analysis of a solar gas turbine
Y. S. H. Najjar 27

20 Simulation of gas turbine environments in small burner rigs
K. L. Luthra 187

21 The need for a standard procedure in hot-salt corrosion testing: Guidelines for hot-salt corrosion burner rig tests
J. R. Nicholls, S. R. J. Saunders 193

22 The oxidation performance of Cr_2O_3-forming commercial iron-nickel alloys at high temperature
F. I. Wei, F. H. Stott 59

23 The VAMAS initiative on advanced materials and standards: The need for a united approach to hot-salt corrosion testing
T. B. Gibbons 171

24 Thermal barrier coatings for turbine applications in aero engines
T. N. Rhys-Jones, F. C. Toriz 73

Composite bearings and seal materials for gas turbines 251
Electrolytic protection against high temperature oxidation 248
Engineering materials research in Japan 248
High performance alloy electroforming 249

High temperature creep properties of silicon nitride 159
High temperature indirect gas-fired furnace 248
Investigation of a SiC/Ti24-Al-11Nb composite 159
Materials for high temperature strain gauges 249
Materials sciences research at ORNL 248
Nickel-based superalloys at high temperatures 250
Predicting life of thermal barrier coatings 250
Properties of graphite/epoxy composites at up to 260°C 249
Time dependent processes with high temperature fatigue of alloys 251
Wettability of brazing alloys on Mo and Mo-Ti-Zr alloy 250

High temperature topics

Advanced ceramic manufacturing plant 243
Aerospace ceramics to be developed at Warwick 42
Automated thermal property measurement 245
Camera system for monitoring ladle furnaces 241
Ceramic fibre board designed to withstand direct flame 42
Ceramic fibre production increased 44
Ceramic powder conditioning furnace 154
Computer model for ceramics design 41
Continuous fibre for metal matrix composites 242
Die technology for improved extrusion speeds and quality 241
Distributed temperature sensor 44
Fire-resistant structural composites to be developed 41
Furnace for even temperature distribution 242
Heat-resistant ceramic tip for fibre-optic probe 105
Heat-resistant tapes and sleeving 44
Improved steam turbine reliability results from European materials project 102
Integrated engineering and materials service 42
Integrated process control for furnaces 243
Interdisciplinary research centre to study materials for high performance applications 152
LAST club 155
Longer life for resistance heating elements 245
Magneto-hydrodynamic electricity generation 107
Materials-testing software 102
Metal matrix composite forgings 104
Modular approach in hot isostatic presses 241
Non-contact alternative to radiation pyrometers 105
Plasma torch wins design award 107
Powder metallurgy equipment manual 247
Response of materials to high velocity impact studied with gas gun 152
Stereo pairs digitized for fracture studies 105
Thermometers for metal and glass manufacture 41
Tube furnace temperature measurement 45
Ultrasonic thermometer 45

composites

plastics · cement · metals · ceramics

At the forefront of the science and technology of reinforced materials since 1969.
